SUMMARY

Frontend-focused full-stack developer specializing in React, React Native, and TypeScript, with solid backend experience in Node.js, NestJS, Vue, and Python. Recent work is in **fintech** — white-label / multi-tenant apps for financial and credit products (PIX, Bitcoin Lightning). Shipped mobile apps serving **60,000+ users**, built white-label customization architecture, and delivered measurable business results. Comfortable owning features end-to-end across distributed, cross-time-zone teams.

CORE SKILLS

- **Frontend:** React, React Native, Next.js, TypeScript, JavaScript, HTML5, CSS3, MobX
- **Backend:** Node.js, NestJS, Express, Python, Java
- **Data & Cloud:** MySQL, PostgreSQL, Firebase, Google Cloud Platform (fundamentals), Graylog
- **DevOps & Tools:** Git/GitHub, GitHub Actions (CI/CD), Docker, Nginx, TestFlight, Figma
- **Domains:** Fintech (financial/credit products, PIX, Bitcoin Lightning), white-label / multi-tenant architecture, third-party integrations
- **Ways of working:** Scrum & Kanban, code review, OKR-driven delivery

EXPERIENCE

Finaya — Frontend Developer (Contractor) · Remote

Nov 2025 – Present

- Work on the front-end development of **white-label fintech applications** for multiple clients: **3 back-office web apps** (4 customers) and a **React Native mobile app** (iOS & Android) serving **60,000+ users**.
- Built a **per-label white-label customization architecture** — pre-built, label-configurable components enabling heavy per-client customization from one shared codebase.
- Established a **pre-production testing flow** (internal testing + TestFlight), letting clients validate builds before launch and raising release confidence.
- Responsible for the full front-end lifecycle — components, deployment, and production release testing — collaborating directly with clients and the backend team.

Stack: React, React Native, TypeScript, MobX, GitHub Actions, Figma.

SAN Internet Brasil Ltda · Santo Ângelo / Remote

Feb 2024 – Present

Full-Stack Engineer (Contractor) · Nov 2025 – Present · Vue, Python, NestJS

- Raised the company's **Google rating from 3.7 to 4.3 in ~3 months** via an in-product review strategy (post-chat review links + dashboard prompts), improving public reputation.

Software Engineer (Contractor, PJ) · Dec 2024 – Nov 2025

- **Integrated Bitcoin Lightning** as a platform payment method.
- Built a **tree-based domain (TLD) suggestion algorithm** for the website.
- Added **automated infrastructure status reporting** (email/web/FTP), reducing support tickets by enabling customer self-service during incidents.

Junior Infrastructure Manager · Feb 2024 – Nov 2024

- **Centralized logging into Graylog** across multiple servers — cut support analysis time and improved **customer satisfaction by ~16.22%**, and sped up infra issue detection.

Platform Builders — Front-End Developer · São Paulo

Sep 2020 – Feb 2023

- Developed a **React Native digital-bank app**: electricity-bill payments with in-app discounts, **PIX** payments, **credit products**, and mobile recharges.
- **Automated in-app chat creation** (previously manual) via a script, removing repetitive manual work.
- Owned feature flags, API integrations, UI components, release & code-quality pipelines, and OKR-based analytics (Crashlytics); ran POCs/benchmarks for new-technology adoption.

Freelance — Full-Stack Developer (iFute) · Remote

Mar 2023 – Jan 2024

- Built an entire **multi-tenant platform solo** — design, infrastructure, backend, back-office web, and mobile app. **Node.js, React, React Native.**

PUBLICATION

Arquitetura de Hardware e Software para a Aquisição e Gestão Integrada de Dados de Usinas Solares — co-author (Roque, A.; Figueiró, I.; **Farias, G. T.**; et al.), *Coleção Engenharias*, Atena Editora, 2025. [DOI: 10.22533/at.ed.5832531033](https://doi.org/10.22533/at.ed.5832531033)

- Built the **Node.js/Express backend (served with Nginx)**, the **database integration / data-persistence layer**, and the **React dashboard** (real-time solar-plant monitoring; OpenWeather API).

EDUCATION

B.Sc. in Computer Science — Universidade Regional Integrada do Alto Uruguai e das Missões (URI) · 2018 – 2023

CERTIFICATIONS (HIGHLIGHTS)

- **Google Cloud** (Coursera): Fundamentals: Core Infrastructure; Essential Infrastructure — Foundation & Core Services.
- **400+ hours of technical courses** (CursoemVideo): JavaScript, Python 3, Java, HTML5/CSS3, MySQL, Git & GitHub.
